THE TIMEX SINCLAIR 1500™ PERSONAL COMPUTER

Cassette-loading software makes it easy to change the function of the T/S 1500 from an entertainment center to a business tool. Most programs are written in Sinclair BASIC (Beginners All-Purpose Symbolic Instruction Code). Some programs are written in fast, efficient machine language. The T/S 1500 will accept both. When using a program in either language, the results and program are shown on the screen.

When you program the T/S 1500, it will immediately check to see if your instructions are correct. If you make an error, it tells you so right away. Most other computers wait until your entire program is written before they identify any syntax errors.

THE T/S 1500 COMPUTER SYSTEM WITH AN EXPANDABLE MEMORY AND PRINTER OPTION

Once you've mastered the basics of computers, you're ready for a more advanced system. Like the T/S 1500. It's really a price/performance breakthrough in black and white computers. The T/S 1500 gives you the convenience of a "typewriter-style" keyboard, the advantage of software cartridges…AND 16K EXPANDABLE MEMORY. Plus, by adding the T/S 2040™ Printer you can print the results of your program at the touch of a button.

Performance comes in small packages

For convenience the T/S 1500 can use the same cassettes as the T/S 1000. But to make full use of its 16K memory and the capacity to do more complex calculations with more sophisticated programs, you can use special software cartridges. These tiny packages make the T/S 1500 the rival of larger, more expensive computers. Another small accomplishment from Timex!

From advanced software to hardcopy

From the keyboard of the T/S 1500 you're in control of the serious programs and the fun and games. As your needs and abilities increase, you can increase the capabilities of the T/S 1500 with an optional plug-in module containing an additional 16K of memory. That gives you twice the computing power.

Then add the T/S 2040 Printer. Whatever you display on the screen, you can print at the touch of a button. The T/S 2040 Printer is small, compact and quiet. A simple connection is all you need to turn the T/S 1500 Personal Computer and the T/S 2040 Printer into a powerful computing system for education, entertainment, home and/or business finance.

1500™ PERSONAL COMPUTER

Nothing so smart was ever so simple...™

TIMEX SINCLAIR PERSONAL COMPUTERS

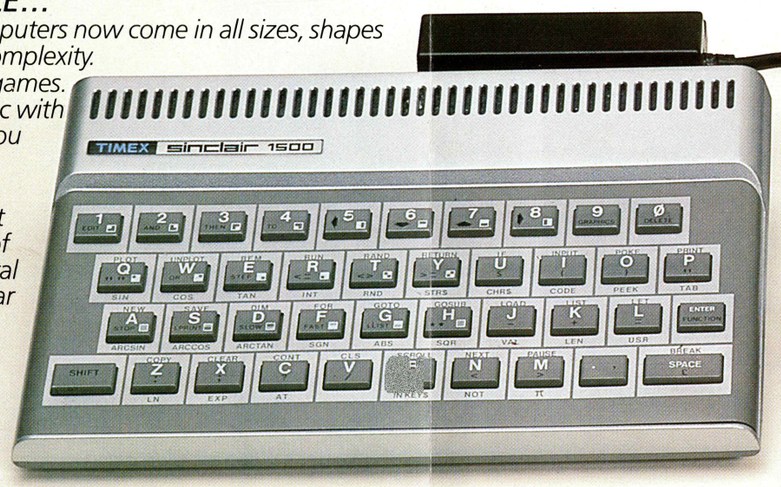
simple…versatile…affordable

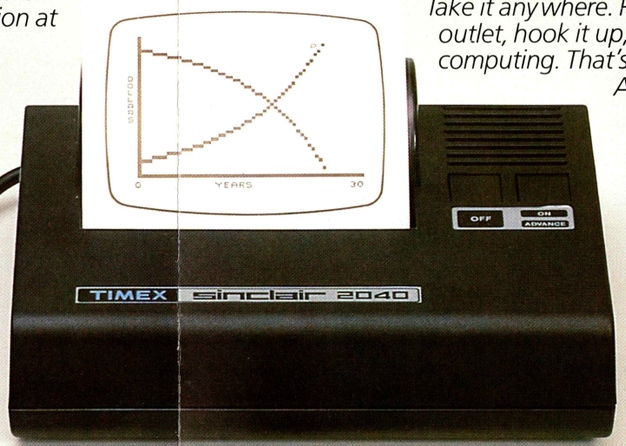
A Timex Sinclair Personal Computer will make your life easier…you can use it to manage the family finances by keeping track of budgets, mortgage payments and tax-deductible items (it sure beats a calculator on April 14th)…your children can use it to learn the basics of communicating with and programming a computer—as well as to play educational and adventure games…you can use it for business and you can track the stock market, monitor investments or control inventory. The point is, everyone in the family can use a Timex Sinclair Personal Computer. It's simple enough for a child to use, yet sophisticated enough to help you learn new skills and manage your time and finances with ease.

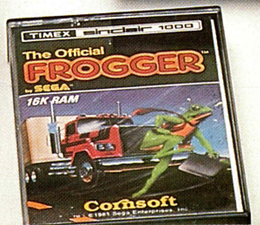
NOTHING SO EASY-TO-USE WAS EVER SO VERSATILE…

Personal Computers now come in all sizes, shapes and degree of complexity. Some only play games. Others play havoc with your patience. You have to put a lot into using some computers to get something out of them, like the total interest on the car loan, or how much the insurance policy will be worth in 1999. One more thing. Personal computers can cost a bundle. Usually, the easier they are to use, the more they cost. Not a Timex Sinclair Personal Computer.

A T/S 1500™ Personal Computer is a small, lightweight, pack-it-up-and-take-it-with-you engineering marvel. Advanced electronics make it sophisticated and versatile enough to play the most exciting adventure games or solve some of the most complex problems. We make it simple. Using cassette-loaded programs small enough to fit a shirt pocket, a few simple procedures, and a little patience, anyone can use a Timex Sinclair Personal Computer minutes after taking it out of the box. Not days, or weeks. And, you can join the computer revolution at a fraction of the cost of a comparable computer system. Timex makes technology affordable!



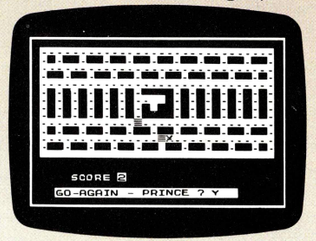




TIMEX SINCLAIR PERSONAL COMPUTERS MAKE IT EASY TO GET STARTED, SIMPLE TO EXPAND

No long list of "mandatory" options, just a lot of standard features.

Timex offers you a choice…The T/S 1500 is the perfect computer for the beginner who wants to learn the basics. It's as easy to use as a calculator, but a lot more powerful. It's so compact and durable, you can pack it in a bookbag or briefcase. Take it anywhere. Plug it into an outlet, hook it up, then start computing. That's all there is to it. A clearly written instruction manual makes it easy to do calculations and scientific functions. You can even create graphics and business forms!



Unique keywords and syntax check make learning to program easy.

T/S 1500 Personal Computers feature a one-touch keyword command entry which eliminates a lot of typing and complicated procedures. Touch RUN and the program is off and running. Touch LIST and see your program on the screen. Follow a few simple procedures and you can display information on graphs or in moving graphics.

Note: Printer may be black or silver.

The T/S 1500 features a display of 44 pixels by 64 pixels with 22 predefined graphics characters and the ability to create moving graphics for educational games.
